

The Red Rock English Language Center (ELC) exists to help you learn English via the internet using state-of-the-art technologies such as **videoconferencing** and **email conferencing**. Red Rock English Language Centre delivers online English as a Foreign Language courses through the internet using live and interactive video conferencing combined with asynchronous, that is, on your own time and schedule, online classrooms. Students may learn English with Red Rock from the privacy and comfort of their own home or from within a more structured environment like a school or learning center.

When you learn English with the Red Rock program, you'll be studying from a curriculum that is wholly aligned to the standards as established by the Common European Framework of Reference. Why is this important? Because the Common European Framework of Reference was designed by the Council of Europe to describe achievements of learners of foreign languages across Europe and to provide a reference for language learning, teaching, and assessment for all main European languages. This means that you'll be studying with a program and its resources that are uniquely recognised and accepted throughout Europe and the English-speaking world.

Whether you are a beginner who has had no previous learning of the English language or an "intermediate learner" who wants to improve your English language abilities, you will be sure to have just the right course here at the ELC!

### Courses to Choose From

Red Rock offers to the English language learner a host of courses from which to choose, ranging from the General English "Beginner" class all the way up to the Mainsuite courses which prepare students for Cambridge ESOL exams.

### Learn from "Real Teachers"

All of these courses are taught by "real teachers". That is to say that Red Rock students interact with a highly experienced and qualified instructor and not simply with a set of CD's and workbooks. Students who are new to learning English will benefit from our unique bilingual Beginner courses which are taught by native English speakers who are fluent in one of the students' native languages, such as French, Spanish, Japanese, Russian, and more.

### ★ LIVE VIDEO AND WEB CONFERENCING

Students receive 52 hours of live instruction from their teacher within the web conferencing environment provided by Elluminate during each 13 week trimester course.

### ★ LEARNING RESOURCES

Your Red Rock instructors will be using resources from such respected publishers as the Oxford University Press, Cambridge University Press, and Pearson Longman.

### ★ ONLINE CLASSROOMS & DISCUSSIONS

Students and teachers interact with one another within online classrooms, discussion areas, and social forums.

### ★ ENGLISH EXAM PREPARATION

All of the courses at the ELC are based on the Common European Framework of Reference (CEFR), and our students may study our courses to prepare for the following University of Cambridge exams: KET, PET, FCE, CAE, CPE, and IELTS.
